

Color Creative with a *Twist*

Eastside Camera Club October Special Assignment

As was suggested by Lorell at our July meeting, we are adding an option component to the Color Creative Special Assignment for October.

You are invited to submit an image from the Train Station using the link below. Five images will be selected from those that have been uploaded at the beginning of September. Again, using the link provided, select any one of the 5 images, download it to your computer and get creative with your style of editing. You will then submit the original and edited image for the October meeting in the Special Assignment / Color Creative category.

This would count as one 1 of your 2 submissions in this category.

Participation in this is optional. You are welcome to submit 2 sets of your own images for this category.

When the images are reviewed in October, It should be very interesting to see how different people view and edit an image.

If you choose to upload an image to be edited, please follow the follow guide.

1. Upload the original / unedited file, Raw is preferred, but jpeg is fine if that is how you captured it.
2. Rename the file to include your last name, so that we can identify the original owner.

Example Original file name 18G173_5687 Submitted file name 18G173_5687Griffin

3. Upload to <https://bit.ly/CCColor-ecc>
4. Send email to t12griffin@gmail.com with the file name you uploaded. I will reply that the upload was successfully and is being considered.
5. We are looking for images of the exterior of the Train Station either before or after the restoration. They should be such that it will allow for club members to be creative in their editing.

Please contact me at t12griffin@gmail.com if you have any question. I would ask that you put Eastside camera in the subject line so it doesn't get over looked in my Inbox.
